Each product is a unique item individually shaped with love and care. All toys allow children to immerse themselves into the vivid imaginative world of play. Every piece of wood tells its own story. You can experience these stories through Ostheimer toys. The surfaces are not sealed but rather the careful treatment with paints and organic oils gives children the possibility to experience the vitality of the wood with all their senses.

An automated external defibrillator or AED is a portable electronic device that automatically diagnoses the potentially life threatening cardiac arrhythmias of ventricular fibrillation and ventricular tachycardia in a patient and is able to treat them through defibrillation. Defibrillation is the application of electrical therapy which stops the arrhythmia, allowing the heart to re-establish an effective rhythm

Kinetic Sand is a fascinating medium and playing with it is a magical and mesmerising experience! It appears like it's alive and moves by itself in a way that will make you want to keep touching it! Build it, form it, smooth it, slice it, mould it, break it and recreate it! The special properties make it soft and stretchy and it won't make a mess (sticks to itself but not to you). It never dries out, is non-toxic and anti-microbial.
