Teach children about the history of Diwali and celebrate the event with these hands on craft activities that they can take home and share with their families.

The biggest festival in the Hindu calendar Diwali, is a five day event coinciding with the Hindu New Year, with the main celebrations held on the third day of the festival on the day of "Amavasya" or new moon.

Celebrated in early spring each year, Diwali symbolises new beginnings and the triumph of good over evil and lifting of spiritual darkness. Diwali celebrations may vary in different communities but its significance and spiritual meaning is "the awareness of the inner light".

Diwali, or Deepavali, means "rows of lighted lamps" in Sanskrit (a Sacred Indian language), today it is the "festival of lights". The celebration involves millions of fireworks, bonfires and clay lamps (diyas) which are illuminated from rooftops, doorways and windows in thousands of temples and buildings all over the countries where the festival is observed.

CALENDARS

## The Purpose of Bellbird's DIY Calendars

The large 6 page calendar is designed to be a great personalised gift for the child to present to parents at the conclusion of the year. The calendar portion includes 2 months per page and highlights the weekends and special days throughout the year and is printed in bright colours, each day block has enough space to add your own notes. The top two-thirds of the page is left blank with a very specific purpose. Over the course of the year this space can be filled with the child's artwork with the intention to highlight the progressive development of the child throughout the year - from beginning to end.

# Kinder & Pre-School Graduation

## “Why we should celebrate”

Graduation is an exciting time - it's both an ending and a beginning, it's warm memories of the past and big dreams for the future.

Graduation ceremonies teach children about change as they move onto a new chapter of their life. Teaching them that change can be a positive experience, which is really important.

Celebrating the ceremonies with teachers, parents and your friends who have helped through the initial years of student life and made learning fun.

Plus, it doesn't get much cuter than tiny children in tiny caps and gowns.

# SENSORY, EMOTIONS + FEELINGS

*Helping children identify and express themselves*

## Understanding emotions & feelings in children

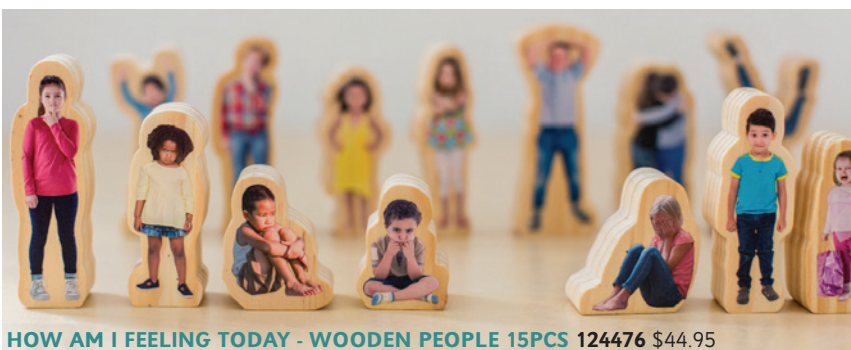

Managing our emotions is hard, whether you are four or six or forty six! Children and adults experience similar emotions and feelings. Frustration, excitement, nervousness, happiness, sadness, jealousy, scared, worried, angry and embarrassed plus others.

Younger children's verbal skills are still developing and therefore won't always talk about how they are feeling and instead show their feelings in other ways. Through facial and body expressions, their behaviour and through play, and sometimes they may act out in physical or problematic ways.

Teaching children healthy ways to express and cope with their emotions and feeling during early childhood will lead to positive attitudes and behaviours later in life.

They will be more likely to:

- Be empathic and supportive of others
- Perform better in school and their working life
- Have more positive and stable relationships
- Have good mental health and wellbeing
- Display less behavioural problems
- Develop resilience and coping skills
- Feel more competent, capable and confident
- Have a positive sense of self

ENVIRONMENT . SUSTAINABILITY . RECYCLING

# How Reducing, Reusing & Recycling leads to Environmental Sustainability

Recycling is central to sustainability - by helping save materials that can be reused and not end up in landfill. This helps reduce the pollution of our ecosystems.

## HOW ARE WE IMPACTING THE ENVIRONMENT

### INDUSTRY & ENERGY SUPPLY

industrial activities such as coal mining, oil refining and power generation.

### WASTE MANAGEMENT

landfills are also known to generate methane - which is bad for the air.

### GLOBAL WARMING

pollution is responsible for changes in our weather patterns.

### TRANSPORT

on-road motor vehicles such as buses, cars and trucks.

## HOW CHILDREN CAN HELP WITH REDUCING POLLUTION

### BE MORE ENVIRONMENTALLY FRIENDLY

Teach children to use eco-friendly and energy efficient products whenever possible.

### LEARN ABOUT RECYCLING

Recycle paper, plastic, glass bottles, cardboard and aluminium cans.

### USE LESS POWER

Turn off lights to save electricity. This means there will be less pollution released into the air from power stations.

### AVOID CARS

Cycle or walk to school rather than have a parent drive you. Alternatively use public transport or carpool.

## SAVING THE EARTH'S RESOURCES

### WATER GARDEN FISH TANK 131897 \$199.95

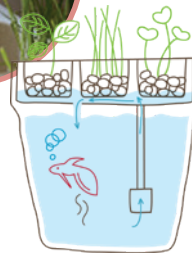

The Water Garden is a fish tank and a planter that grows herbs and sprouts for your classroom! Using a natural ancient agriculture technique called Aquaponics — the fish waste provides nutrients for the plants. Everything included except the fish. Size: 34 x 24 x 34cmH

### THE SELF-CLEANING CYCLE

Aquaponic ecosystem: no weekly water changes needed!

- 1 Your fish produces nutrient-rich waste.
- 2 In regular aquariums, the nutrient-rich waste builds up and becomes harmful to your fish. In the Water Garden, the plants are continually taking up these nutrients as food to grow.
- 3 The clean filtered water drops back down to your fish!

## Recycling reduce and reuse

### RECYCLED MEDIUM MAT ABORIGINAL DESIGN - "TURTLE JOURNEY" BLUE/WHITE 146514 \$109.95

About the Artist and the Artwork....

Helen Price is a Queensland-based Indigenous artist, from Darumbal Country. Her Turtle Journey design speaks of the real life migration pattern of turtles, who travel hundreds of miles for the breeding season, but always return. The turtle never forgets where it comes from and nothing can keep it from coming home. There is something inside, in its soul, that knows the way, says the artist. It is similar to the journey back to country, where your soul is at home. A discussion starter for multicultural topics in early learning centres or community groups. All Aboriginal Design Recycled Mats have been created by Indigenous Aboriginal or Torres Strait Islander artists under the guidelines of the Indigenous Art Code that promotes authentic, fair and ethical trade in artwork & allows for transparent processes around the production and sale of artwork.

# Why teach STEAM in Early Education

## “Keeping it simple & fun”

STEAM, calls on educators in Early Childhood to give children opportunities to investigate an idea in a variety of settings. By asking the right questions, we can help stimulate investigations where students are identifying objects, making comparisons, making predictions, testing ideas and sharing discoveries all while observing their natural environment.

STEAM is the way we articulate and understand the world, how we humanise it. It’s about discovering how our world works, how it can be improved, how we can live sustainably, and how we can improve the wellbeing of future generations.

STEAM skills are applicable through daily life and exploring these in an integrated way through books, discussions, experiments, art projects and educational games every day, allows children a holistic approach to learning and building a strong foundation for future learning.

**METHOD:** Mix all the ingredients together in a large saucepan over a medium heat for 3-5 minutes, until the mixture congeals.

### What should STEAM look like for young children?

- Science encourages investigation and answering questions, often involving experimentation.
- Technology refers to using simple tools like crayons and rulers, as well as more complex ones like microscopes and computers.
- Engineering refers to recognizing problems and testing solutions.
- Arts encourage creativity and allow children to illustrate concepts they are learning.
- Mathematics deals with numbers, but also patterns, shapes, organizational skills and much more.

### How the lessons link to the Early Years Learning Framework?

Each lesson links to principles, practices and learning outcomes of the Early Years Learning Framework, which are highlighted for educator's convenience on each lesson plan. These links have been identified through trialling these lesson plans in Early Childhood settings, however other outcomes may be observed depending on the children and educators taking part in the lessons. Each lesson plan clearly articulates how it links to the EYLF.

### Quality area 1 - Educational program and practice:

The KindyGarden is implemented as part of the educational curriculum. The documentation templates allow educators to document children's voices and learning, as well as showing links to the EYLF.

### Quality area 2 - Children's health and safety:

Children are introduced and encouraged to participate in healthy eating and hygiene practices.

### Quality area 3 - Physical Environment:

The KindyGarden helps embed sustainable practices in the Early Childhood service. The KindyGarden also supports children to take responsibility for the environment. Furthermore, the KindyGarden is perfect to help services meet Education and Care Services Regulation regarding children having access to natural materials and resources.

### Quality area 5 - Relationships with children:

The KindyGarden encourages all children to be involved, if they choose. As a group project, this encourages children to collaborate, communicate, share ideas and be respectful. The KindyGarden also offers opportunities for educators to build reciprocal relationships with the children throughout the project.

### PAISLEY PARK GROUP CHILDREN'S CENTRES

Profile: Brand New Purpose-Built Childcare Centre

Working together with the Paisley Park Group to provide educational resources to their centre which follow their core concepts of LIVE - LOVE - LEARN.

The centre is designed to challenge the independent minds of children from 6 weeks to 6 years. Bellbird completed a fitout and centre setup of educational resources with storage options and rugs. The products ranged from baby through to kinder age and consisted of exploration and discovery, construction, literacy and pretend play plus outdoor play accessories and art & craft consumables. Each room was created with a homelike environment to give children familiar surrounding through to the outdoor spaces to encourage investigation and active play.

We want to nurture the children's creativity and curiosity and support their growing thirst for knowledge.

“ I believe that the service that Bellbird are providing is one that goes beyond a typical client relationship ”
