LED Aroma Diffuser & Humidifier NEW RANGE

Our beautiful aroma diffusers offer many functions that can benefit both health and wellbeing. Unlike traditional oil burners or incense, our aroma diffusers don't require candles or matches and so are a much safer option for your aromatherapy needs. Simply put 2-3 drops of essential oil in the water tank and plug in. This is then dispersed into the air and inhaled to energise or calm, depending on the essential oil chosen. The mist button stops automatically when the water is low. The humidifier generates moisture and negative ions from the water and steam which assist breathing, can provide allergy and sinus relief, aid sleep and also cleanse and purify the air if using oils with antibacterial properties. The aroma diffuser also has a beautiful LED light function, emitting a calming glow which moves through different colours. Choose from three settings: Press once for 7 alternating, calming LED colours, Press twice to set to one colour or Press and hold for 3 seconds to turn off the LED light. Our aroma diffusers are supplied with AC adaptor and measuring cup.

National GHS Cleaning Chemicals Legislation

What is "GHS"?

The Global Harmonised System (GHS) is internationally used to standardise and harmonise the classification and labelling of chemicals - including cleaning chemicals.

When does the "GHS" legislation take effect?

The laws came into force in most states of Australia on 1st of January 2017. GHS has not been implemented in Victoria, Western Australia or the Australian Capital Territory, however all states and territories recognise and accept GHS labels and safety data sheets. This matter is covered under the Work Health & Safety regulations in all States. Breaches will be handled in the same manner as for other Work Health & Safety matters.

What does "GHS" mean for you?

From 1st of January 2018, all labels on all cleaning chemicals that are sold into childcare centres must have appropriate "GHS" pictograms present on the label. All wording on labels must also be compliant with standard GHS hazard and warning statements. This is a regulatory workplace health and safety requirement.

Do Solo Pak products meet the "GHS" for the classification and labelling of chemicals?

Yes. Solo Pak are an Australian owned company, who have been manufacturing cleaning chemicals for over twenty years. They specialise in products suited to the childcare industry and have been at the forefront of ensuring their product labelling meets the stringent "GHS" guidelines.

Solo Pak

Solo Pak manufacture a range of super concentrated cleaning products that are easy-to-use, cost-effective, non-hazardous, environmentally friendly and suitable to use around children.

Solo Pak Cleaning System

Automatic Foam Soap Dispenser

Good hygiene is essential for all childcare centres, kindergartens and schools. This Automatic Hand Soap Foam Dispenser has a sensor which reduces the possibility of cross contamination. Using the foaming soap dispenser is more cost efficient than liquid soap, as 0.4ml is dispensed each time allowing for approximately 2,000 washes per 800ml Foam Soap lotion pod (Sold separately code: 157291A). The disposable pods are very easy to load and the unit is lockable to prevent little hands from accessing the pod. When washing hands, simply place your hands underneath the sensor. The sensor will automatically activate the pump, which dispenses the soap. The unit is powered by 3 x C Alkaline batteries (Sold separately code: 124827) with extra low battery consumption when in standby and comes with screws and adhesive to attach to walls.
