# Puzzle Complexity Guide

## EASY GRIP PUZZLES

The first introduction to puzzles, they provide easy piece manipulation for younger children, or children needing assistance with coordination and fine-motor control.

## PEG PUZZLES

Play a vital role in the development of logical thought, gross and fine motor skills. The understanding of shape and positive and negative space. Starting with one piece peg puzzles and working through to whole picture pegs.

## STARTER PUZZLES

The next step after single piece Pegs and the beginning of a child's ability to "see" positive and negative shapes in a more complex form.

## RAISED PUZZLES

Raised Puzzles sit-up in the tray above the background. This allows small fingers to easily manipulate the pieces – extending fine motor development.

## TRAY PUZZLES

The tray helps to contain the pieces and gives the child a border within to work. Subject matter and the child's developing abilities determine the puzzles selected. However, a successful outcome of achievement should be considered most important when choosing the piece count.

## TABLE PUZZLES

Feature pieces which are chunky and easy to manipulate. The puzzles easily fit onto a table top and make great group activities. No borders and freeform shapes give the child different learning experiences. Table Puzzles help develop verbal communication and interaction with other children.

## LAYERED PUZZLES

Puzzles with more than one layer have more than one objective. The multiple layers will increase the difficulty of the task and allow children to understand more than one angle of the concept being taught.

## FLOOR PUZZLES

When piecing together a Floor Puzzle children need to maintain balance, stretch and move to complete the picture. The large chunky pieces make it easier for children to assemble the large puzzles on the floor. Floor Puzzles are fantastic group activities.

Tuzzles puzzles are a proudly Australian owned company and all puzzles are manufactured in Australia to a very high standard. All Tuzzles puzzles are safety tested by an authorised international testing facility. Large Easy Grip & Knob/Peg puzzles are tested for 18 months plus. All other puzzles are tested for 3 years plus to international safety standards. However, content, piece counts and a child's development may determine targeted age usage. This should be at the discretion of the educator.

Puzzles help children develop a range of skills including visual motor skills, proprioception, vestibular, tactile and fine gross motor. These are all pre-reading essentials and are extremely important in early childhood development.

Tuzzles puzzles are designed and created to provide you with many years of educational and enjoyable use. Whilst Tuzzles puzzles are durable and can withstand the rigours of a classroom, it is important that the puzzles are turned and tipped over, rather than pieces being picked out by hand. This will ensure the longevity of the product.

“Consider a successful outcome of achievement as the most important factor when choosing puzzles as children will stay focused and engaged to then attempt more complex puzzles.”

## Giant Easy Grip Puzzles

## Tuzzles Giant Easy Grip Peg Puzzle
